

DARSHIL MODI

+91 79849 50064 | darshilmodi99@gmail.com | [LinkedIn](#) | [GitHub](#) | Ahmedabad, Gujarat

SUMMARY

First-year B.Tech CSE (AI & ML) student at Adani University with hands-on experience building production-grade multi-agent AI systems, LLM pipelines, and full-stack AI applications. Two-time hackathon finalist and team leader (SIH '25, Tic-Tech_Toe '26). Deeply passionate about Machine Learning — from LLM agent design to semantic reasoning — and eager to contribute to real-world AI/ML projects through an internship.

EDUCATION

Adani University — B.Tech CSE (AI & ML)

2025 – Present | CGPA: 8.5 / 10 (Sem 1)

TECHNICAL SKILLS

Languages & Frameworks: Python, C, JavaScript, HTML, CSS, React.js

Databases & DevOps: PostgreSQL, MongoDB, ChromaDB, Redis, Docker, Git, GitHub

AI / ML & Automation: Multi-Agent AI, LangGraph, LLM Agents, n8n (Workflow Automation), Prompt Engineering (Zero-Shot, Few-Shot, CoT, ToT), SHAP, NLP, Computer Vision, Semantic Embeddings

PROJECTS

TalentAI-X — Multi-Agent Talent Intelligence System [GitHub](#)

Tic-Tech_Toe '26 | Team Lead

Python | LangGraph | FastAPI | PostgreSQL | ChromaDB | Redis | SHAP | Docker

- Architected a 5-agent LangGraph pipeline (Parser → Normalizer → Semantic Matcher → Entity Resolver → Skill Intelligence) achieving 87% matching accuracy via Chain-of-Thought reasoning + semantic embeddings — vs. 40–55% for traditional ATS keyword matching.
- Built bias-aware scoring with dual blind/sighted evaluation, SHAP attribution on every hiring decision, 500+ skill synonym mappings, and HITL review queue; compliant with NYC Local Law 144, Colorado AI Act 2026, and GDPR.

EduMentor — AI Learning Agent for Low-Resource Students [GitHub](#)

Personal Project

Python | Multi-Agent AI | LLM | Memory Management

- Designed a 4-agent tutoring system (Content Agent, Tutor Agent, Evaluation Agent, Coach Agent) with persistent session memory, PDF/web summarization, auto-generated quizzes, and adaptive study plan generation for students in low-resource settings.

Agri-Sage — AI-Powered Agricultural Assistant [GitHub](#)

Kaggle AI Agents Capstone · Track B

Python | Gemini | Computer Vision | NLP | Multi-Agent AI

- Led development of a 4-agent system (Gateway, Diagnosis, Market, Synthesis) delivering real-time crop disease diagnosis via computer vision, personalized farming advice, and market intelligence with multi-lingual SMS/voice support for smallholder farmers.

HACKATHONS & ACHIEVEMENTS

Smart India Hackathon (SIH '25) — Team Leader

2025

- Guided team through problem selection, solution architecture, and final-stage presentation; advanced to the national finals competing against hundreds of teams across India.

Tic-Tech_Toe '26 — Team Leader

2026

- Built TalentAI-X — a production-grade, bias-aware multi-agent AI hiring platform — and led team to the final stage in the Multi-Agent AI & Talent Intelligence domain.

College Tech Club Events

2025 – Present

- Actively participated in 5–6 technical events; consistently represented ideas with confidence and strong communication.

CERTIFICATIONS

Prompt Engineering for Everyone — IBM Developer Skills Network / Cognitive Class

2025

Mastered Zero-Shot, Few-Shot, Chain-of-Thought, and Tree-of-Thought prompting to design accurate, reliable LLM outputs — applied directly across all three AI agent projects.

Kaggle × Google — 5-Day AI Agents Intensive Course

2025

Completed Google's intensive program on advanced AI agent architectures, tool use, and real-world deployment; built Agri-Sage as the capstone under the Agents for Good track.

Yuva AI for All

2025

Gained applied knowledge in AI ethics, practical AI tools, and responsible AI for social good — aligned with India's national AI mission.
